

Kindergarten Prichindel , Suceava, is a partner in the ERASMUS program (Erasmus + Program, KA220SCH – Cooperation Partnerships in School Education), in the LIBERTEC-LIBrary as online Educational Repository Techniques in European Community preschools project, together with units (pre)schools from Spain, Portugal, Italy. This project resulted in the development of a Guide/publication as a result of the collaborative activity between all European partners, a work that includes basic digital skills for educators, tools and programs for managing educational activities in kindergarten, skills and technical procedures for digitized pedagogical documentation. Between October and November 2023, three teaching staff from Kindergarten "Prichindel", Suceava, who participated in the initial training in Malaga (LTTA July 2023), organized a series of workshops attended by 36 preschool teachers. The workshops referred to Phase 3 of the LIBERTEC project – Testing and evaluation, subphase 3.2 "Local workshops in partner countries" and aimed to expand knowledge about the content of the Guide. The trainers involved in the three sessions teachers from both the "Prichindel" Kindergarten and the Kindergarten "1-2-3", Suceava and presented a proposal for the digitization of pedagogical documentation within early childhood education. These workshops were designed as a preliminary activity for the field test, when 4 teachers from the partner kindergartens will experience in their daily work the methodological contents on the digitized pedagogical documentation provided by the Guide.
